

# SINGAPORE ASSOCIATION FOR PRIVATE EDUCATION (SAPE)

SAPE is an industry association for the private education industry, formally established in July 2012 by founding President, industry veteran Dr KC Lee, the Chief Executive of SIM Global Education, with the vision for SAPE to build a community of best practices, facilitate the adoption of innovation and technology, skills upgrading and process improvement for PEIs in maintaining Singapore's competitive edge as an education hub.

SAPE is an inclusive association that represents all private education providers registered with the Committee for Private Education under the Enhanced Regulatory Framework (ERF) and EduTrust Certification.

Currently, SAPE has many of the largest and best-known Private Education Institutes (PEIs) as its management committee members; these include East Asia Institute of Management, James Cook University, Kaplan, MDIS, PSB Academy, SIM Global Education and TMC Academy, amongst others.

The diversity in the PEIs sector is also represented by the profile of SAPE's members, with representation of international schools and professional training schools in the Association.

We encourage more diversity in the Association as we believe SAPE can be in a better position to meet the needs of the sub-sectors within the private education eco-system.

# KEY THRUSTS AND INITIATIVES

One key thrust of the Association is to help SAPE members to continuously upgrade their quality and competency. SAPE keeps a close tab on new education innovations and technology developments that are rapidly shaping the education industry of the future. Through SAPE's Capabilities Development programmes which include seminars, workshops, conferences and industry trips, PEIs can benefit from knowledge sharing by industry thought leaders.

# GOOD PARTNERSHIP AND RELATIONSHIP WITH KEY STAKEHOLDERS

SAPE's members can benefit from its outreach programmes in collaboration with government agencies such as SPRING, IMDA and IE for PEIs on capability development and productivity strategies and relevant government assistance schemes.

SAPE aims to serve as the sounding board for viewpoints on government policies and initiatives relevant to PEIs.

With these strong links, the Association can be the nexus to represent the interests of our members to build a conducive industry environment for quality and growth.

# CODE OF CONDUCT

All SAPE members subscribe to the SAPE Code of Conduct. All members are committed to uphold the good reputation and image of the Singapore Private Education industry.
